## Ducted AC Hot Water System

### Benson Enviro 3 Reverse Cycle

While our system is heating and cooling your house, it can also:

- Heat or boost a solar system
- Heat a storage tank, new or old

Reap the benefits of incredible energy economies:

- 1kW of power into the AC Hot Water system Generates 3.1kW Cooling Effect plus 4kW Hot water Heating Effect (1kw = 7EER)\*

\*Some conditions apply

Benson Airconditioning has been working together with companies overseas to design the Benson Ducted AC Hot Water System for Australian Conditions. This standard unit is now to be launched and exported world wide.

The Benson Enviro 3 AC Hot Water System can be used as booster system or as a complete hot water system with high efficiencies of 1kW input to near 4kW heating output.

It can also be used as a normal ducted air conditioning system, cooling or heating as required.

#### What makes this system so special?

While system the unit is heating or cooling, it can heat your hot water for free. Yes - free!

We have added a special process to the air conditioning system to remove the heat to your hot water systems.

The system has been designed for ease of installation especially in remote areas, utilising the chilled water / heat pump system for the indoor unit.

#### Unit Sizes:

Cooling 12.3kW, Heating 12.5kW - Single Phase (Model Number: BENHW-1P-D-123R / RC) and Three Phase (Model Number: BENHW-1P-D-125R / RC3) units will be available

#### Related products

A Wall Split AC Hot Water System is also available
